

# BEDFORD RESEARCH FOUNDATION

## GET INVOLVED

*Help us accelerate solutions for understudied health problems affecting millions of people.*

### BECOME A DONOR

Ways to give include: donate online, create a gift fund in honor of an individual, family or organization, planned giving, and monthly recurring gifts. Because we receive no federal funding, our research depends on donors like you.

***Because of our innovative funding model, 94% of each donation goes directly to research.***

---

### BECOME A PARTNER

BRF works with universities, companies and private individuals to advance projects and increase awareness of developments in stem cell research.

***We work with partners around the world to further research that has the greatest potential to develop cures.***

Available in-house resources we offer to partners are: over 40 years experience in reproductive biology and virology, an FDA inspected laboratory, GLP facility (Good Laboratory Practice), a non-NIH funded facility and equipment, and board oversight committees, e.g. Science Advisory Committee, Human Subjects Review Committee, and an Ethics Advisory Board.

---

### BECOME A SPONSOR

Sponsorship opportunities include:

The Foundation's two semi-annual events *The Activated Egg Symposium* and *The Spinal Cord Workshop*. Both events bring together world-renowned researchers in an intimate, collaborative setting. Attendance is capped at 100. Sponsors at these events have unique access to thought-leaders.

***BRF events and publications attract the world's leading researchers.***

The Foundation's website, newsletter and named plaques in our new facility in Bedford also offer outstanding access to an exclusive research community around Boston and the world.

---

***Your support is invaluable to this important research. Please don't hesitate to contact us with any questions about how you might get involved!***
